Career Objective

Curious and dedicated B.Tech IT student looking to start a professional journey in the IT industry by learning on the job, contributing to team goals, and building strong technical expertise.

Education

Noida Institute of Engineering and Technology

2023 – 2027

Bachelor of Technology in Information Technology (CGPA: 8.61)

Greater Noida, India

Relevant Coursework

- Data Structures & Algorithms
- Database Management Systems
- Object-Oriented Programming
- Operating Systems
- Computer Networks
- Web Technologies

Certifications & Internships

C++ Programming Internship

May 2024 – Jun 2024

Codsoft

Remote

- Gained hands-on experience in object-oriented programming, data structures, and algorithm design.
- Developed small applications and problem-solving programs using C++.
- Strengthened debugging and logical thinking through coding assignments.

Web Development Internship

Aug 2025 – Sept 2025

Oasis Infobyte

Remote

- Gained hands-on experience in frontend web development using HTML, CSS, and JavaScript.
- Built a responsive Calculator app with keyboard support and real-time arithmetic operations.
- Developed dynamic projects including To-Do List and Login Authentication system with form validation.

Online Communication Skills Course

2023

British Council

Online

- Completed a professional course focused on communication, teamwork, and problem-solving skills.

Software Development Fundamentals Course

2023

Infosys

Online

- Learned fundamentals of software development, programming logic, and IT industry practices.

Projects

Payment Success Analyzer Dashboard | React.js, JavaScript, Chart.js

March 2026

- Built a data visualization dashboard to analyze payment transaction success rates and system performance.
- Visualized payment method distribution and transaction trends using interactive charts and graphs.
- Implemented dynamic UI updates using React state management for real-time data insights.
- Designed a responsive interface to help identify failure patterns and optimize payment workflows.

Weather Health Monitoring System | React.js, Node.js, API Integration

May 2024

- Developed a health monitoring web application that analyzes real-time weather conditions and generates alerts for potential health risks.
- Integrated external weather APIs to collect environmental data such as temperature, humidity, and air quality.
- Designed a responsive dashboard with interactive UI components to help users monitor environmental health factors.
- Provided health awareness insights for users affected by asthma, allergies, and seasonal respiratory conditions.

Technical Skills

Languages: C++, JavaScript, Python, SQL

Frontend: HTML, CSS, React.js, Tailwind CSS

Backend: Node.js, Express.js

Database: Basics of MongoDB, MySQL

Tools: Basics of Git, GitHub, VS Code

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, REST APIs
